

RALPH MIGUEL COMPLIDO

AGENTIC AI DEVELOPER | SOFTWARE ENGINEER

Los Angeles, CA, United States (Willing to relocate) | (323) 286-5412
rcomplido.la.usa@gmail.com | LinkedIn | GitHub | Portfolio

PROFILE

Agentic AI Developer and Software Engineer specializing in Python applications, multi-agent workflows, and AI solutions deployed on Azure. Hands-on experience integrating language models, retrieval-augmented generation (RAG), and agent tools with automated CI/CD pipelines. Microsoft-certified through AI-103 and AI-901, with a supporting background in C#, ASP.NET Core, and full-stack development. Combines software engineering and business process automation experience to build practical applications for complex workflows.

TECHNICAL PROFICIENCIES

Agentic AI:	Microsoft Agent Framework, multi-agent orchestration, RAG, tool calling, MCP, structured outputs, human-in-the-loop workflows, AI guardrails
Languages / Frameworks:	Python, Pydantic, C#, ASP.NET Core, Entity Framework Core, Angular, TypeScript, SQL, HTML/CSS
Azure AI:	Azure AI Foundry, Azure AI Search, Document Intelligence, Content Safety
Cloud / DevOps:	Azure, Docker, GitHub Actions, CI/CD, Azure Container Registry, Azure Container Apps, Git
Data / Engineering:	PostgreSQL, pgvector, SQL Server, Azure SQL, REST APIs, asynchronous programming, automated testing, authentication and authorization

CERTIFICATIONS

- Microsoft Certified: Azure AI Apps and Agents Developer Associate (AI-103)
- Microsoft Certified: Azure AI Fundamentals (AI-901)
- AWS Certified Cloud Practitioner
- CompTIA Project+
- ITIL 4
- Google IT Support Professional Certificate
- Claude Certified Developer - Foundations

PROFESSIONAL EXPERIENCE

Agentic AI Developer (Apprenticeship), SkillStorm Jul 2026 - Present

- Develop Python applications and agentic AI workflows through applied training and collaborative software projects.
- Build agents that retrieve evidence, use specialized tools, and coordinate tasks through structured workflows with validation and human review.
- Apply Python API development, database integration, asynchronous programming, and automated testing to build maintainable applications.
- Implement CI/CD pipelines and deploy containerized services to Azure; earned Microsoft AI-103 and AI-901 credentials.

Software Engineer, CodeLogix Oct 2025 - Jun 2026

Los Angeles, California, United States

- Developed a cloud-based accounting application using ASP.NET Core Web API, Angular, SQL Server/Azure SQL, Docker, and Azure.
- Implemented ASP.NET Core Identity, bearer-token authentication, and role-based authorization for accounting users.
- Built chart of accounts, journal entries, debit/credit validation, and reporting; deployed through Azure Container Registry and Azure Container Apps.

PROFESSIONAL EXPERIENCE (CONTINUED)

Software Engineer, MCGI Hub

Apr 2025 - Oct 2025

Remote

- Contributed to an enterprise platform delivering virtual meetings and services to an international user base.
- Developed backend services with ASP.NET Core, Entity Framework, SQL Server, Clean Architecture, and REST API practices.
- Built database, API, and Angular UI components for the Configuration Management Service.
- Collaborated with a distributed Agile team through sprint planning, issue tracking, and cross-browser testing.

Automation Engineer / Senior Accounting Specialist, Strength United

Jul 2019 - Apr 2025

Northridge, CA

- Built Python automation to streamline accounting, payroll, reporting, and grant management processes.
- Automated financial analysis, forecasting, employee timesheet preparation, and signature request workflows.
- Developed cost allocation processes for operating expenses and personnel costs across multiple grants.
- Supported finance operations and IT needs while replacing repetitive manual tasks with automated workflows.

Operations Manager, Dazzlingrock.com

Oct 2012 - Jul 2019

Los Angeles, CA

- Automated order fulfillment workflows supporting thousands of weekly e-commerce orders.
- Streamlined shipping label generation, tracking updates across marketplaces, and batch barcode printing.
- Improved inventory and order management processes through workflow automation.

PROJECTS

Multi-Agent Document Analysis System

SkillStorm Project

Python | Microsoft Agent Framework | Azure AI | MCP | PostgreSQL | Docker | GitHub Actions

- Co-developed a multi-agent system that analyzes payroll documents and produces evidence-backed findings for human review.
- Orchestrated specialized agents with conditional routing, concurrent execution, and independent review to resolve incomplete or conflicting findings.
- Integrated Azure document extraction and RAG with deterministic Python rules to deliver cited, traceable results.
- Automated CI/CD with GitHub Actions and deployed the Dockerized MCP service to Azure Container Apps.

EDUCATION

Western Governors University

Jul 2024 - Jan 2026

Bachelor's Degree in Software Engineering

UCLA Extension

Jan 2017 - Jan 2018

Full Stack Web Development Program
